## Practical Life Homework

### Leaf Cleaning

#### **Instructions:**

1. Carefully carry a small plant to a table.
2. Carefully carry a small sponge and a small bowl of water to the table and place it beside your plant.
3. Before cleaning the leaves of your plant, examine them for any visible dust or dirt. Identify any areas that need extra attention.
4. Gently hold a leaf with your subdominant hand and your sponge with your dominant hand.
5. Lightly wipe the leaf with the sponge, moving in a gentle, sweeping motion from the base to the tip of the leaf.
6. Follow the steps to clean the rest of the leaves, dipping your sponge in the water as needed. Be sure to squeeze out any excess water before continuing to clean the leaves.
7. Carefully return the plant to its proper place and let the leaves air dry.
8. Use your sponge to wipe any wet spots on the table, then rinse the sponge and return it to its proper place to dry.

If you would like to send in a 3x5 hard copy photo of your child performing this task, we will be happy to post it on our Community at Work bulletin board. Seeing themselves on the board gives them a greater sense of pride and encourages independence.
