## **Practical Life Homework**

### Care of Environment: Cleaning a Table

#### **Instructions:**

1. Collect a cloth or sponge and wet it under warm water.
2. Squeeze the cloth to wring out any excess water and bring it to the table.
3. Starting at the top of the table, wipe the table from one side to the other, moving back and forth until you reach the bottom of the table.
4. Move your cloth in smooth, straight lines. This will help you clean in an organized way.
5. After you have wiped the entire table, use small, gentle circular motions for any spots that need extra attention.
6. If your cloth become too dirty, fold it to a clean side or rinse it and continue so you don't spread dirt around.
7. Don't forget the edges of the table. Wipe them carefully from top to bottom as well.
8. Once the table is clean, rinse out your cloth and return it to its proper place.
9. Take a moment to admire your work!

If you would like to send in a 3x5 hard copy photo of your child performing this task, we will be happy to post it on our Community at Work bulletin board. Seeing themselves on the board gives them a greater sense of pride and encourages independence.
